

FEMA COVID-19 Vaccination Update

Release Date: March 31, 2021

WASHINGTON - - Federal pilot community vaccination centers opened today in Boston; Newark, New Jersey; Norfolk, Virginia and Yakima, Washington. Additional centers are scheduled to open next week in Gary, Indiana and St. Louis.

FEMA remains committed to the equitable distribution of vaccines. Using data from CDC's social vulnerability index and population data from the census, the agency continues working with state partners to locate community vaccination centers where they will be able to do the most good for the most vulnerable populations and ensure everyone who wants a vaccine gets one.

The agency has now provided more than **\$4.47 billion** for expenses related to COVID-19 vaccination at 100% federal cost share. These [funds cover critical supplies, staffing, training and transportation needs](#) that support increased vaccination efforts.

Community vaccination centers are led by states, but may be supported by the federal government, including FEMA. Each state determines its own vaccination priority groups and procedures. FEMA continues working to speed up vaccinations by supporting states as they open community vaccine centers across the country and continues working with interagency partners to stand-up and provide support to additional centers daily.

Find out where, when and how to get a vaccine in your community and get more information from [your local health department](#) and a [list of places where adults can get a vaccine](#).
