

FEMA Welcomes New National Advisory Council Members

Release Date: ??? 1, 2022

WASHINGTON -- FEMA Administrator Deanne Criswell announced today the appointment of 16 new members and 3 returning members to the agency's National Advisory Council.

For the first time in the council's history, a Tribal representative was appointed as council chair. Please join us in congratulating the new National Advisory Council chair, **Mr. Jeff Hansen, Director of Community Safety for the Choctaw Nation of Oklahoma**. Previously, Chair Hansen served as the vice chair of the council for four years, working alongside outgoing Chair W. Nim Kidd, Chief of the Texas Division of Emergency Management. FEMA appreciates Mr. Kidd's many years of devoted service.

"The National Advisory Council brings together diverse voices and viewpoints to help us better identify and address the emergency management challenges facing FEMA and our nation," said Administrator Deanne Criswell. "I am proud to share that, for the first time in its history, a Tribal Nation representative will serve as the chair of the council. Jeff Hansen, of the Choctaw Nation of Oklahoma, dutifully served four years as vice chair of the council and I am confident he will continue to serve our nation well in this new role. Additionally, beginning in 2023, the size of the council will grow from 35 to 40 members, including positions designated on climate change. These new positions will allow FEMA to be better informed as we carry out our mission of helping people before, during and after disasters."

The National Advisory Council advises the FEMA administrator on all aspects of emergency management, including preparedness, protection, response, recovery and mitigation for disasters and national emergencies. Council members represent a substantive cross-section of officials, emergency managers and emergency response providers from state, local, tribal and territorial governments, the private sector and nongovernmental organizations. Since its creation in 2006, the council has provided nearly 400 recommendations to FEMA on a variety of key emergency management topics.
